

# STICKALASE™

The ultimate ultra fine laserable material

Surface colour	Core colour	Thickness
		0.09 mm (0.004")
silver	<b>black</b>	19872
<b>black</b>	<b>white</b>	19871

Note:  
For a larger choice of colours, see Flexilase™.

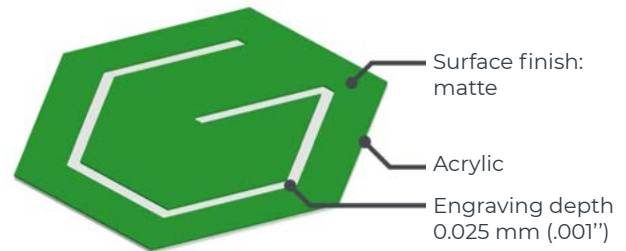

- Our thinnest material: surface layer of 0.09 mm (0.004") for fine engraving and clean cut when using a CO2 laser.
- Very good material for small labels on curved surface.
- Delivered in 10 metres (32') roll, with adhesive backing.

## AVAILABLE SHEET SIZES

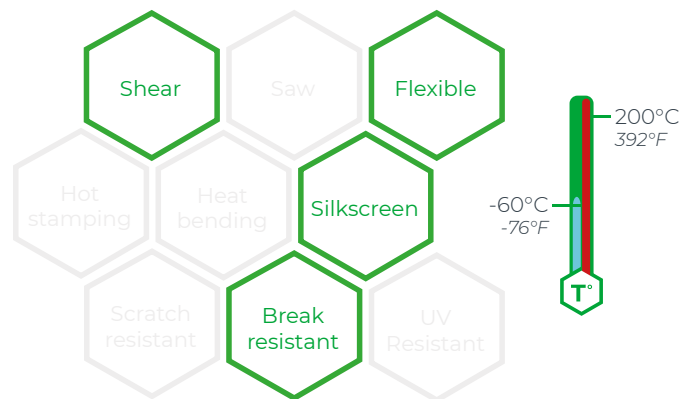

120 mm x 10 m  
4.75" x 32'
